PERCIPIA

PRECISION VM
Voice Mail

WHAT IS PRECISION VM?

Precision VM was built specifically for the hospitality industry. Precision VM is powerful enough to handle both guest and administrative mailboxes while being flexible enough to swap and move between rooms and retrievable from an archive. Never miss a voicemail with our message forward feature; which allows you to listen to your voicemails from anywhere, all you need is access to your emails.

FAQ'S

Q: CAN I ACCESS MY MAILBOX OFF PROPERTY?

A: Yes, your mailbox can be retrieved from anywhere.

Q: WILL A MAILBOX BE AUTOMATICALLY CREATED WHEN A GUEST CHECKS IN?

A: Since Parallax PMS integration software is needed to power Precision VM, a mailbox will be created when a guest checks in, and will wipe the mailbox upon checkout.

Q: WHAT HAPPENS TO VOICEMAILS WHEN A GUEST CHECKS OUT?

A: Messages will be archived and stored for two months. Management or front desk will have an access code and password; which they will use to log in, input last name, check-in check-out dates and room number. If that information matches our system, you will be able to retrieve and forward the messages. After two months messages will automatically be deleted.
